“MORE THAN A MILLION MOMS FOUND THE SECRET TO SAFER, HAPPIER AND HEALTHIER BABIES!”

Arizona Grandmarentrepreneur Joan Bergh reached an amazing business milestone early this year. Millions of babies are happier, healthier and safer because of good old fashioned grandma creativity and common sense. What better time than Mother's Day to celebrate a great achievement that was conceived in the heart of a mom. The Floppy Seat® Shopping Cart and High Chair Cover was invented out of the need to create a safe, fun, comfortable environment for children while shopping or at a restaurant. Parents everywhere agree that it is uncomfortable and unsanitary for children to be placed in a grocery cart or public high chair without a cushion. Creating a barrier to all that cold hard contaminated steel, wood or plastic seems to make sense to most parents.

“We call it the Million Mom Milestone!” According to Certified Baby Comfortologist Grampa Dave of Floppy Products, Inc. “Well over 1 million moms have chosen to protect their babies with our shopping cart covers. That equates to multiple millions of babies that are in our good care! We are thrilled to blow past the million in sales mark. Leave it to good old fashioned maternal instinct and mom know how! Great moms just have a way of figuring out what is best for their baby. We love it when we see happy babies and less stressed moms using our products.”

The Floppy Seat® is most noted for its ease of use, designer patterns, extra fluffy comfort and patented 360° coverage. The Loops of Fun™ keeps toys in the seating area helping to make shopping time fun time. Floppy Products is celebrating the Million Mom Milestone with product discounts and contests. For a chance to win a free floppy or for more information, go to www.floppyseat.com or call us at info@floppyseat.com or 480-429-0787.
